Lecturer of Diabetes
Endocrinology &

Dear, Colleagues

It is a great pleasure to announce the 11th annual meeting of the Egyptian Society of Diabetic Foot (ESDF).

ESDF aims to enhance foot care for diabetic patients all over Egypt through spreading knowledge and enhancing active collaboration between all specialties interested in saving limbs and lives of diabetic subjects.

Our mission is to increase awareness of the burden of diabetic foot all over Egypt. Therefore, starting from 2019, we will hold our annual conference in a different Egyptian city each year. We are pleased to announce that the 11th annual conference will be held at Ismailia governorate, in the center of Suez Canal area.

On behalf of the organising Committee, it is our great pleasure to invite you to participate in this exciting event. The conference will overview both science and practice of diabetic foot, with emphasis on the practical aspects of the disease. The conference will be held at :

Tolip El Forsan Hotel-Ismailia, 18-17 October 2019

Prof. Hanan Gawish

Chairman of ESDF and
Secretary of PADFSG

Prof. Mamdouh El-Nahas

Board member of PADFSG

Executive Board Members of
ESDF

Prof.
Mamdouh El-Nahas

Prof.
Hanan Gawish

Prof.
Manal Tarshoby

Prof.
Omnia State

Prof

William Jeffcoate

was first appointed consultant endocrinologist in Nottingham, UK, in 1979. Much of his early research was concerned with non-diabetes endocrinology but the work load of clinical diabetes meant that his research interests slowly shifted in that direction, and to the diabetic foot in particular. He established one of the first ever multidisciplinary clinics for foot disease in 1982 and set up the Foot Ulcer Trials Unit in Nottingham in 2002. Together with Professor Game he has successfully completed a number of large multicenter trials of treatments and he has published extensively – mainly on the reasons why the evidence base for clinical care of the diabetic foot is so weak. He also drew attention to the importance of inflammation in the Charcot foot in a Hypothesis published in The Lancet in 2005. He is currently Clinical Lead of the National Foot Care Audit of England and Wales.
